

Please do not lessen restriction on local radio limits or cross ownership. Media concentration is out of hand and is killing the music business, artists and hurting democracy. We now have a situation where artists have to pay radio broadcasting on public airwaves to get their music played, as opposed to radio paying the owner of the sound recording copyright as in the rest of the world. Not only should you not lessen the rules, you should go back to the way things were before 1996
